EXP NO: 10b) Wireless InterNetworking

Aim:

To design and configure an internetwork using a wireless router, DHCP Server and Internet Cloud.

Algorithm:

1. Open Cisco Packet Tracer
2. Add a wireless router, DHCP server and Internet cloud
3. Add the required wireless devices.
4. Connect the devices to the wireless router
5. Configure the DHCP server with IP settings
6. Configure the wireless router settings
7. Enable DHCP for automatic IP assignment
8. Connect the wireless devices to the network.
9. Verify the assigned IP address.
10. Test connectivity between the devices and Internet Cloud.

Result:

Thus, the wireless internetwork was successfully configured and connectivity was verified.
