EXP. NO: 11a) Static Routing

Aim:

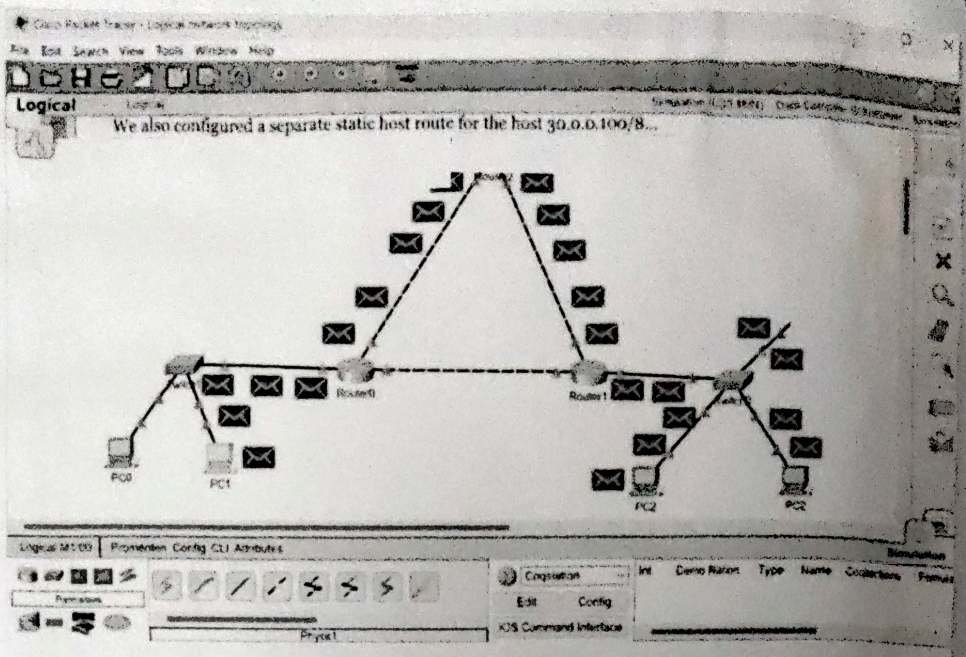

To configure static routing using cisco Packet Tracer.

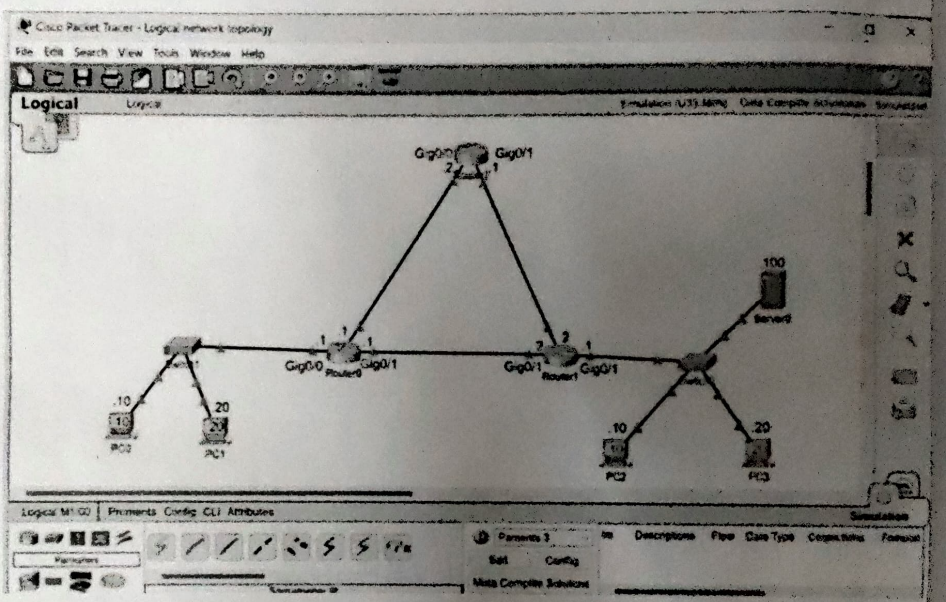

Algorithm:

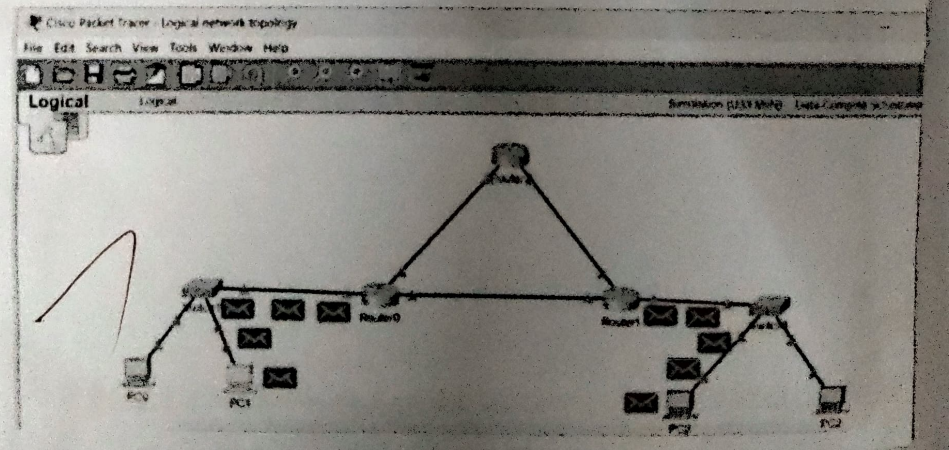

1. Open cisco packet Tracer.
2. Create the required router and PC topology.
3. Connect the devices using suitable cables.
4. Assign IP addresses to PCs and Router interface.
5. Enable router interfaces using no shutdown.
6. Configure static routes using IP Route.
7. Configure the Required backup route.
8. Check the routing table using show IP route.
9. Test connectivity using Ping.
10. Verify communication between the networks.

Result:

Thus, the echo client - server was successfully implemented using sockets.

Logical
We also configured a separate static host route for the host 30.0.0.100/8...
