EXP.NO:12a) Echo Client Server

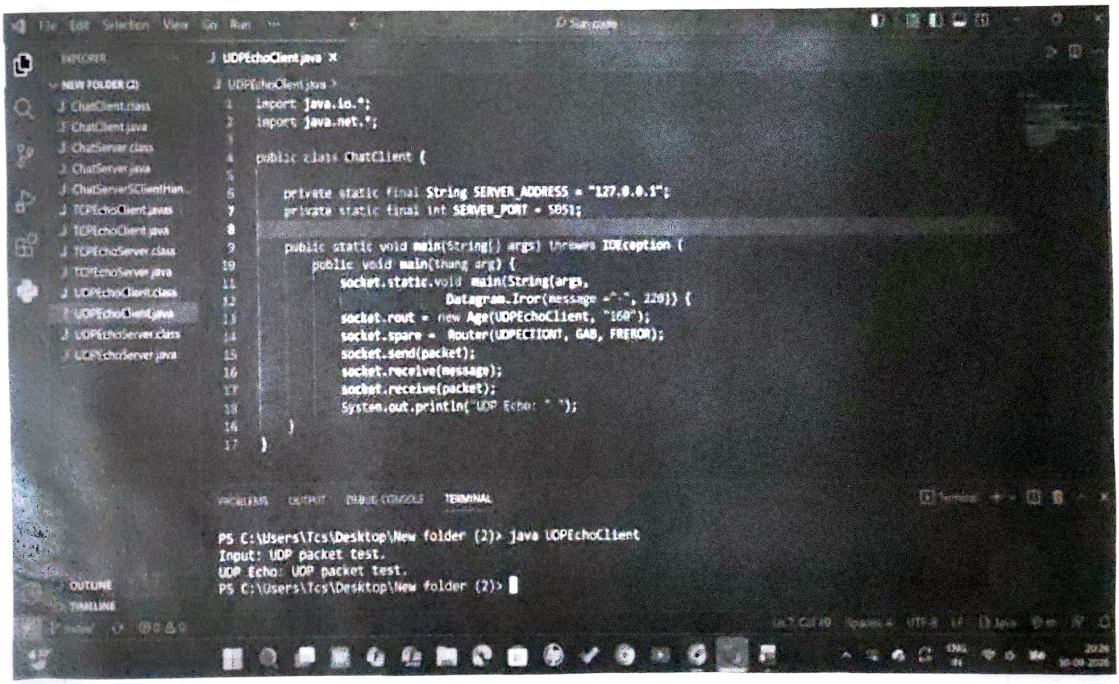

Aim:

To implement an echo client-server using TCP / UDP sockets.

Algorithm

1. Create the server socket
2. Bind the socket to an IP address and port
3. Start listening for client requests.
4. Create the client socket.
5. Connect the client to the server
6. Enter a message from the client.
7. Send the message to the server.
8. Server receives and echoes the message.
9. Client receives the echoed message.
10. Close the socket.

Result:

Thus, the echo client - server was successfully implemented using socket.
